M.Gilles
- 12:00 Discussion on review of the ICdA Guidance document in relation to our 2020 target for urinary Cadmium and discussion on restarting a cycle of H&S training meetings, each covering a specific item of the ICdA program (as we did 4 years ago)  
P. de Metz
- 13:00 Lunch
- 14:00 Reporting on workplace air monitoring OCdAir-  
M.Gilles
- 14:30 Guidance for OCdAir-4 and compliance with the revision of the monitoring standard EN-  
M.Gilles
- 15:30 Program of the International Cadmium Conference 26-27  
M.Gilles
- 15:45 A.o.b.
- 16:00 End of the meeting

The red line throughout the meeting will be the REACh authorisation procedure, which is only 2-3 years ahead of us, and related to this, the importance of the data collection programs OCdBio (Cd in blood and urine) and OCdAir (workplace personal air sampling) as key elements to support the authorisation. Although data collection is important, I would like to remind all of you that taking remediation actions when exposure is too high is as important.

People that are not able to attend the meeting in Brussels are given the opportunity to join by telephone conference through the Arkadin conferencing system
